Bauer Technologies is a Service-Disabled Veteran Owned Small Business (SDVOSB)

ABOUT US

Bauer Technologies, Inc. is a Service Disabled, Veteran-Owned Small Business (SDVOSB) headquartered in Arlington, VA. Prior to establishing Bauer Technologies, the founders of the company have more than 26 years of combined experience within the Department of Defense supporting Army, Air Force, Navy, and Marines. Our solutions include design, engineering, deployment operations, sustainment, and information assurance of secure technology and critical infrastructure for the protection and safety of our customers' mission-critical information enabling them to meet their most critical business and mission objectives.

OUR MISSION

To deliver rapid and reliable IT solutions targeting mission essential requirements with cost-effective technologies that enables customers to exceed their most critical business and mission objectives.

OUR VISION

We are built on the premise of enduring dexterity in all things IT. We are not content to sit idle on emerging technologies and capabilities. This inevitable progress impels relentless revision and cultivation of what we offer. Ultimately, our goal is to always evolve our skill set into real world offerings in support of your mission.

Computer Network Defense (CND)

Integrating state-of-the-art sensing capabilities to provide network-monitoring appliances that maximize defensive posture on the digital battlefield.

Our network engineering team is directly involved with the Defense Information Systems Agency (DISA) and National Security Agency (NSA) efforts to field sensing and data acquisition appliances at the Internet Access Points (IAPs) from the DoD Points of Presence (POP), as well as the high-volume Core points within the DoD. As a key integrator, our team is actively engaged in the engineering and testing activities that are essential prerequisites to fielding operational solutions, usually comprised of multiple technologies from various manufacturers.

Information Assurance (IA)

Providing comprehensive Certification and Accreditation (C&A) support under both DoD and Defense Information Assurance Risk Management Framework (DIARMF) and its principles.

Our IA team has decades of experience managing and conducting the full spectrum of C&A activities, tasks, and deliverables under both DoD and RMF processes. Our personnel are well positioned to provide support to be able at all times to perform the specific tracking of advancements in information and security technology, high-level security engineering, architecture design and development, analysis & evaluation, research, assessment, and risk management requirements. This includes support for the DoD C&A transformation initiative and compliance with the Defense Information Assurance Risk Management Framework (DIARMF) and its principles.

Engineering and Implementation

Developing secure information systems and complex networks that focus on usability and empower communities of users to leverage capabilities through Net-Centric design.

Our engineering team operates in small, agile units capable of rapidly delivering business value and adapting to evolving customer needs. Teams are composed of both engineers and designers, creating an environment in which technical skill and creative talent are combined to produce flexible, easy-to-use products. Each member of the team is thoroughly trained in IA principles, allowing for incorporation of IA elements from the ground up.

Program and Project Management

New mindset with program and project managers that understand service management, network engineering, security engineering, system engineering, business process improvement and a variety of other IT related disciplines.

Bauer Technologies employs modern, agile program and project management methods tailored to each individual program and focused on efficiently and effectively meeting our customers' mission and business objectives. Our skilled ITIL and PMI certified PMP professionals manage every aspect of program development including cost, schedule, functional, quality assurance performance, and delivery.

Dedication

As a service-disabled veteran-owned small business, Bauer Technologies is a perfect fit for your organization. We are dedicated to your mission, because we have walked in your shoes

Delivery

We are driven to provide efficient and sustainable IT services. Our product is defined by your mission

Development

Our products are never complete. We are impassioned about technology and pursuit for top-tier IT service delivery. This posture spearheads our perpetual initiative to develop and enhance the products we offer
